

West MOPoCo closure event

Wednesday 14 April 2021 – 14 :00-16 :00 CET – webinar

Roundtable – Feedback on the implementation of the West MOPoCo project

Malek Smaoui - REMPEC

Enhancing emergency decision-making capabilities

Objectives	Deliverable	Remarkable achievement	Way Forward
<u>Enhancing emergency decision-making capabilities</u>	Marine HNS Response Manual - Multi-regional Bonn Agreement, HELCOM, REMPEC	Unique Manual updating and replacing three existing receptive manuals (2000, 2001, 2002). Regional specific annexes	Regional Multi-regional - Joint programme and activities between the three regions capitalising respective achievements and experience. International - International HNS Manual
	Maritime Integrated Support Information System on Transport of Chemical Substances (MIDSIS TROCS 4.0)	Interconnected to other data bases and guidance. Designed for use in the field (offline application) or office (Online version)	Regional – EU – Interregional - Continuous improvement process through an advisory informal Partner committee. EU - Enrich the Tool data base with those developed within future EC funded projects
	Common Emergency Communication System for the Mediterranean	Concrete steps to set up the system: 1. technical and IT to interconnect Resources/Equip data bases 2. Technical specification to unify request of assistance using/through CECIS MP Platform	Regional – EU - Continue REMPEC-DGECH joint efforts for the concretization of steps 1 and 2 - Envisage the same principle for the notification and Exchange of information (SSN). - Implement a sub regional Exercise (WestMOPoEx)

Assessing contingency planning / Strengthening cooperation and national emergency procedures

Objectives	Deliverable	Remarkable achievement	Way Forward
<u>Assessing contingency planning</u>	7 national self-assessments of the level of preparedness to OSR	For the 1 st time in the Mediterranean self – assessment are carried by 7 countries	National- Regional - Extend the use of the Readiness Evaluation Tool at the regional level and scopes (Gov and Industry) - REMPEC assists the countries to make these assessment a continuous process
	7 Manuals on National mechanisms for the mobilization of response equipment and experts in case of emergency	For the first time 7 Manuals provided the list and details on the equipment available within States' capabilities and under different fields of cooperation (Industry, SCP, multilateral cooperation through REMPEC, EMSA, UCPM.	National - Regional - Avoid lack of info that may affect the responsiveness of operation in case of emergency, when such means are required. - Recognize the value of use of traditional form in word format (he template) combined with external support (consultant) that allowed countries to centralize the information
<u>Strengthening cooperation and national emergency procedures</u>	Study on Synergy between the three subregional agreements	18 recommendations to create synergy between the SCPs to strengthen mutual cooperation	National –Sub-regional - Create the network of SCP Secretariats. - Implement productive synergy for further cooperation in preparedness for and response to marine pollution
